

PCR Australasia Pty Ltd operates under the guidance of co-directors Mr. Peter Lewis and Mr. Alan Gosling, and is a multidisciplinary consultancy dedicated to excellence in service and support to the World's aviation industry. The practice was set up in 1998 and has maintained a steady growth serving an increasingly wide and varied client base.

PCR Australasia is able to provide the services of a very experienced group of aviation professionals with skills in all facets of civil aviation from the provision of advice and assistance on policy making at the highest level through to specialists in Institutional Strengthening, Aviation Management Training, Master Planning, Airport Operations and Design, Air Traffic Management, Civil Aviation Regulations, and Airspace and PANS/OPS Procedures design.

PCR Australasia is proud of its association with many of the world's aviation regulatory authorities, regional and international airport operators, developers, civil engineering consultants and contractors who depend upon our support and specialist expertise.

PCR Australasia is fully conversant with ICAO, FAA, JAA, UK, Australia, New Zealand and other leading-nations standards and practices and has provided extensive services to its clients that range from feasibility studies and conceptual and detailed design, through to specifications, tendering and tender evaluation, and including project management and turnkey operations.

PCR Australasia offers expertise in the design and specification of radio navigation aids including, air traffic control tower systems, meteorological systems, aviation communications systems, surveillance facilities including ADS and Multilateration, GNSS (GBAS, SBAS), ADS and Aerodrome Ground Lighting.
